

Welcome Circuit

20 min · Abs, Back, Chest, Legs

Welcome to week 2! We have 4 circuits to complete; Each circuit has an 10-minute time cap! Try to complete all reps in each exercises as fast as you can, before moving on to the next. Once complete, rest for 60 seconds before attempting the next. Repeat the last circuit 2X

Crab Toe Touches

no
rest

30 reps

Circuit A. Even if you can't touch you toe, reach directly ahead as far as you can for 30 total reps!

Jumping Calf Press

60 reps

Circuit A. If you'd like this to transform to star jumps, by all means change it up!

Side Plank

no
rest

40 secs

Circuit A. Only use you left side here!

1:00
rest

Supermans

no
rest

40 reps

Circuit B. Are you superman/superwoman? Soon...

Hip Raises

40 reps

Circuit B. Make the bridge as straight as you can!

Static Squat Hold

no
rest

50 secs

Circuit B. Take mini rests if necessary!

1:00
rest

Dead Bug

no
rest

30 reps

Circuit C. Our final circuit of the day! Push push push!

Air Squats

30 reps

Circuit C. We can't finish without popping out a few squats, can we?

Side Plank

no
rest

40 secs

Circuit C. On to the right side only. Finish up like a boss!

1:00
rest

Decline Push-ups

8 reps

Burpees

no
rest

60 secs

Jump Squats

no
rest

30 secs

Crab Toe Touches

Primary muscle group(s):

Hamstrings, Lower Back, Quadriceps, Shoulders, Upper Back & Lower Traps

Secondary:

Abs, Calves, Obliques

Sit on the floor with your feet in front of you and hands behind you. Your fingers can be pointed towards the side or behind you. With your feet on the floor, lift your hips skyward. Pause when your body is parallel with the floor.

Focusing on contracting the core first, bring your right hand up while simultaneously lifting your left leg up. Touch your right hand to your left toes.

Slowly return to the elevated position and switch sides. Bring your left hand to your right toes. Keep alternating back and forth.

Jumping Calf Press / Raises

Primary muscle group(s):

Calves

Stand up straight with your hands at your sides.

Keep your back straight and your core tight.

Forcefully press off the ground with the balls of both feet.

Launch into the air and land softly on the balls of your feet.

Focus the tension in the calf muscles, NOT the quadriceps.

Repeat.

Side Plank

Primary muscle group(s):

Obliques

Secondary:

Abs

Lie on your side on an exercise mat.

Fully extend your legs with one resting on top of the other.

Fully extend the top arm down the side of your body.

Bend the arm at floor level to 90 degrees. Your upper arm should be parallel to your body, while your forearm is at 90 degrees. This is the start position.

Lift your body off the ground and balance on your forearm and the side of your foot, while keeping your body in a straight line.

Contract your abdominal muscles and relax your shoulders.

Continue breathing throughout the whole exercise.

Hold this position for as long as you can.

Relax and change sides.

Repeat.

Supermans / Extended Arms & Legs Lifts

Primary muscle group(s):

Lower Back

Secondary:

Abs

Lie face down on a mat, with your arms fully extended above your head and your legs fully extended behind you.

Lift your chest, arms and legs off the floor by arching your back. Only the tops of your quads and your lower abdomen should be in contact with the floor.

Hold for a count of 2 while squeezing your abdominals and obliques.

Return to the starting position for a count of one, then repeat.

! This exercise can be done using one arm and it's opposite leg at a time. For example, right arm and left leg raised while your left arm and right leg remain on the floor. This method of execution allows you to use the free hand to push down on the floor to lift your chest higher from the ground.

Hip Raises / Butt Lift / Bridges

Primary muscle group(s):

Glutes & Hip Flexors, Hamstrings

Secondary:

Abs, Lower Back

Lie on an exercise mat with your knees bent so that your feet are flat on the floor. Keep your back straight.

Place your hands out to your sides palms flat for stability.

Raise your glutes off the floor by extending your hips upward while pushing down through you heels.

Continue until your back, hips and thighs are in a straight line. Hold for a count of one.

Return to the start position by lowering your hips back to the floor.

Pause then repeat.

Static Squat Hold

Primary muscle group(s):

Quadriceps

Secondary:

Abs, Calves, Hamstrings

Place your feet at shoulder-width or just outside of shoulder-width. Turn your toes out slightly. Brace your core and keep your chest up.

Swing your arms up to shoulder level as you slowly bend your knees and push your hips backward. Lower yourself until your thighs are parallel with the ground.

Pause and stay in this position for as long as you can. Return to the starting position by dropping your arms and push your hips forward.

Dead Bug

Primary muscle group(s):

Abs

Lie on your back. Extend hands straight above towards the ceiling. Bring your knees up to a 90-degree angle. Shins should be parallel to the floor. Exhale and bring hips off the floor.

Begin by extending one leg forward. The foot should be hovering just above the ground.

Pause then return the leg to it's starting position while extending the opposing leg. Keep alternating legs while maintaining a tight core.

Air Squats

Primary muscle group(s):

Hamstrings, Quadriceps

Secondary:

Abs, Hamstrings

Place your feet at shoulder width apart while keeping your chest up and your abdominals braced.

Begin the movement by swinging your arms up towards your shoulders. At the same time, bend at the knees and drive your hips back like you're sitting in a chair.

Once your upper thighs are parallel with the ground, pause, then drive your hips forward to return to the starting position.

Side Plank

Primary muscle group(s):

Obliques

Secondary:

Abs

Lie on your side on an exercise mat.

Fully extend your legs with one resting on top of the other.

Fully extend the top arm down the side of your body.

Bend the arm at floor level to 90 degrees. Your upper arm should be parallel to your body, while your forearm is at 90 degrees. This is the start position.

Lift your body off the ground and balance on your forearm and the side of your foot, while keeping your body in a straight line.

Contract your abdominal muscles and relax your shoulders.

Continue breathing throughout the whole exercise.

Hold this position for as long as you can.

Relax and change sides.

Repeat.

Decline Push-ups / Pushups

Primary muscle group(s):

Chest

Secondary:

Abs, Shoulders, Triceps

Facing down, place yourself on the ground with your hands flat on the floor, directly below your shoulders.

Place your feet on top of a bench or box. Only your toes and balls of your feet should be touching the floor.

Maintain a flat back and tight core before lowering your chest towards the ground.

Bend your elbows at a 60-degree angle until your chest is just above the ground. You should feel a stretch across your chest. Hold for a count of one.

Push yourself back to the starting position by straightening your arms. Do not lock out your elbows.

Repeat.

Burpees / Squat Thrusts

Primary muscle group(s):

Abs, Glutes & Hip Flexors

Secondary:

Chest, Shoulders

Stand straight with your feet shoulder width apart and hands by your sides. This is the start position.

In one smooth motion, squat down and place your hands palms down on the floor in front of your feet.

Lean forward, so your weight is on your hands, at the same time jumping your legs out behind you until they are fully extended. Your body should form a straight line with your weight supported on your toes and the balls of your feet and your arms fully extended. (In a push up position)

Jump your feet out by spreading your legs, so that they are wider than hip width apart, then immediately jump them back together.

Complete 1 full push up.

Jump your feet forward to just behind your hands.

Use an explosive motion to push through your heels and return to the start position.

Repeat.

Jump Squats

Primary muscle group(s):

Glutes & Hip Flexors, Quadriceps

Secondary:

Abs, Calves, Hamstrings

Stand with your feet hip width apart. Your toes should be pointing straight ahead or only slightly outward.

Cross your arms in front of your body, place your hands behind your head or at the sides of your head.

Keep your weight on your heels and bend your knees while lowering your hips towards the ground as if you are sitting down on a chair.

Keep your back straight at all times.

Continue until you feel a slight stretch in your quadriceps. Do not let your knees extend out beyond the level of your toes.

Pause for a count of one.

In an explosive movement, drive down through your heels pushing yourself up of the floor with your quads.

At the same time extend our arms out above you.

Land with your knees slightly bent to absorb the impact.

Repeat
